Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Allowable Subject Matter

2. Claims 1-7 are allowed.

3. The following is an examiner's statement of reasons for allowance: The claims, setting forth an apparatus including a wheel and tire assembly having inboard and outboard wheel mounted on a single wheel hub about a common axis, a tire diameter adjustment means allowing adjustment of the tire's air pressure while the wheel assembly is rotating, an actuator associated with the tire diameter adjustment means, a computer in communication with one or more sensors for detecting a variety of conditions, wherein the wheel assembly has a plurality of tire configurations such that the inboard wheel only is in contact with the ground, the outboard wheel only is in contact with the ground, or both wheels are in contact with the ground; have been found to be allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references are considered to show variable diameter wheel assemblies. For example, Bott shows a wheel assembly of the type described above.
